Why Enterprises Choose PERSIVX?

17

INTRODUCTION

PersivX is a business intelligence & Analytics platform built for modern enterprises that need **speed, scale, and simplicity - without trade-offs.**

Analyze large datasets in seconds, not hours.

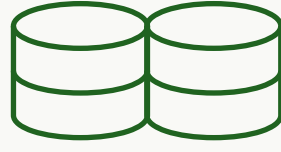

Generate AI-driven insights instantly, and automate workflows - all within a single platform.

From finance and operations to supply chain and sales, PersivX enables teams to move from **manual reporting to intelligent decision-making** - faster, more accurately, and with complete confidence.

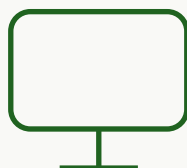

No heavy infrastructure. No complex setup. Just results.

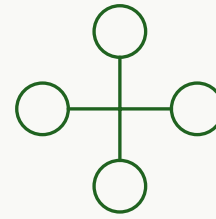

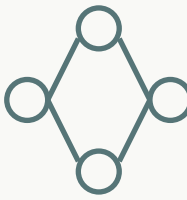

What Makes PersivX Different

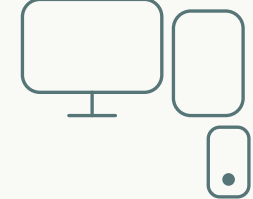

100GB+ datasets
 Process 100GB+ datasets on low-resource servers - without heavy infrastructures

Speed to Value
 From setup to actionable value in days, not weeks.

AI Built In
 Forecasting, anomaly Detection, trend detection and summarization, and insights - no data science team required

All-In-One Platform
 Analytics, AI, reporting, and workflows in one simple system

Automated Workflows
 Alerts, Schedulers, and conditional logic to cut manual task by 60%

Use on any device
 All PersivX features work across all smart devices including laptops, mobile, smart TVs and displays etc.

PersivX enables teams across industries to:

- Access real-time, reliable data effortlessly. **90% faster reporting.**
- Ensure **governance and compliance** are embedded at every step.
- Collaborate with confidence across functions and geographies. **60% reduction in manual work.**
- Leverage AI-driven insights to move from reactive analysis to proactive strategy. **Real-time decision systems.**
- Drive **measurable business outcomes** that fuel long-term growth.

Speed at Scale

100GB+ datasets on low-resource servers (no heavy infra required)

Built-in Intelligence

Forecasting, anomaly detection, and insights—no data science required

One Unified Platform

Analytics, AI, workflows, and reporting in a single system

Automation First

Eliminate repetitive tasks with alerts, schedulers, and workflows

Built for Every Industry

PersivX adapts to the unique challenges of any business.

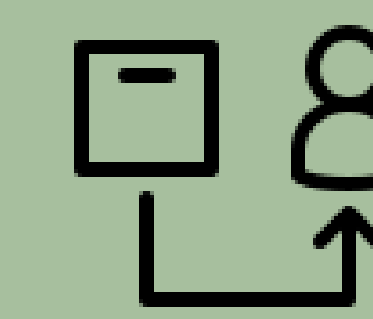

Manufacturing

- **AI-Driven Insights:** Optimize production schedules and detect inefficiencies with agentic AI.
- **Real-Time Analytics:** Monitor machine performance, downtime, and production quality instantly.
- **Live Data Blending:** Integrate data from factory machines, CRM, and inventory management systems.

Finance

- **Lightning-Fast Reports:** Generate comprehensive financial summaries with millions of rows in milliseconds.
- **Live Data Blending:** Combine internal financial data with external market sources for a complete view.
- **Security & Compliance:** Enterprise-grade security ensures your sensitive financial data stays safe.

Supply Chain

- **Real-Time Tracking:** Monitor shipments, warehouse inventory, and delivery status across geographies.
- **Risk Management:** Identify bottlenecks, delays, and supplier risks with AI-powered alerts.
- **Demand Forecasting:** Blend market demand signals with internal sales data for accurate procurement planning.

+ Pharma, Healthcare, Supply Chain, Retail, Steel, and more

What leaders say about PersivX

Mr. Ajay Agarwal

MD, ICD Dhannad

“Reports have supported in making Financial and Operational decisions faster. **Their support for development and maintenance of reports is commendable.**”

Mr. Krishna Mekala

GM, Automation Solex Energy

PersivX unified our financial and inventory reporting, cleaned up our books, and freed up 60% of our payments team from repetitive work. We’re now moving beyond operations into predictive dashboards that help us plan with confidence.

CO-FOUNDERS

Harsh Jain

Harsh Jain is the founder of Persiv Technology and a former engineer at Morgan Stanley, where he built and maintained mission-critical systems used by **2,500+ global users daily** across Risk and Compliance.

With a strong foundation in enterprise systems, product thinking, and software architecture, Harsh developed PersivX to **solve a clear gap in the market:**

BI tools are either powerful but complex, or simple but limited.

Today, PersivX delivers simplicity without compromising performance or capability.

Ankit kumar

Ankit Kumar, Co-founder of PersivX, brings a wealth of experience from multiple high-growth startups he previously worked at. He has **successfully led cross-functional teams** to architect and deliver complex, full-stack applications across diverse industries, ranging from automated financial systems to scalable web platforms.

With a deep technical foundation in building end-to-end solutions - including mission-critical invoice generation platforms and sophisticated data pipelines. Ankit is **now spearheading the integration of advanced AI capabilities into the Persiv ecosystem**. His leadership is defined by a commitment to technical excellence and a "zero-to-one" mindset, ensuring that every project is built for both **immediate impact and long-term scalability**.

AT ITS CORE

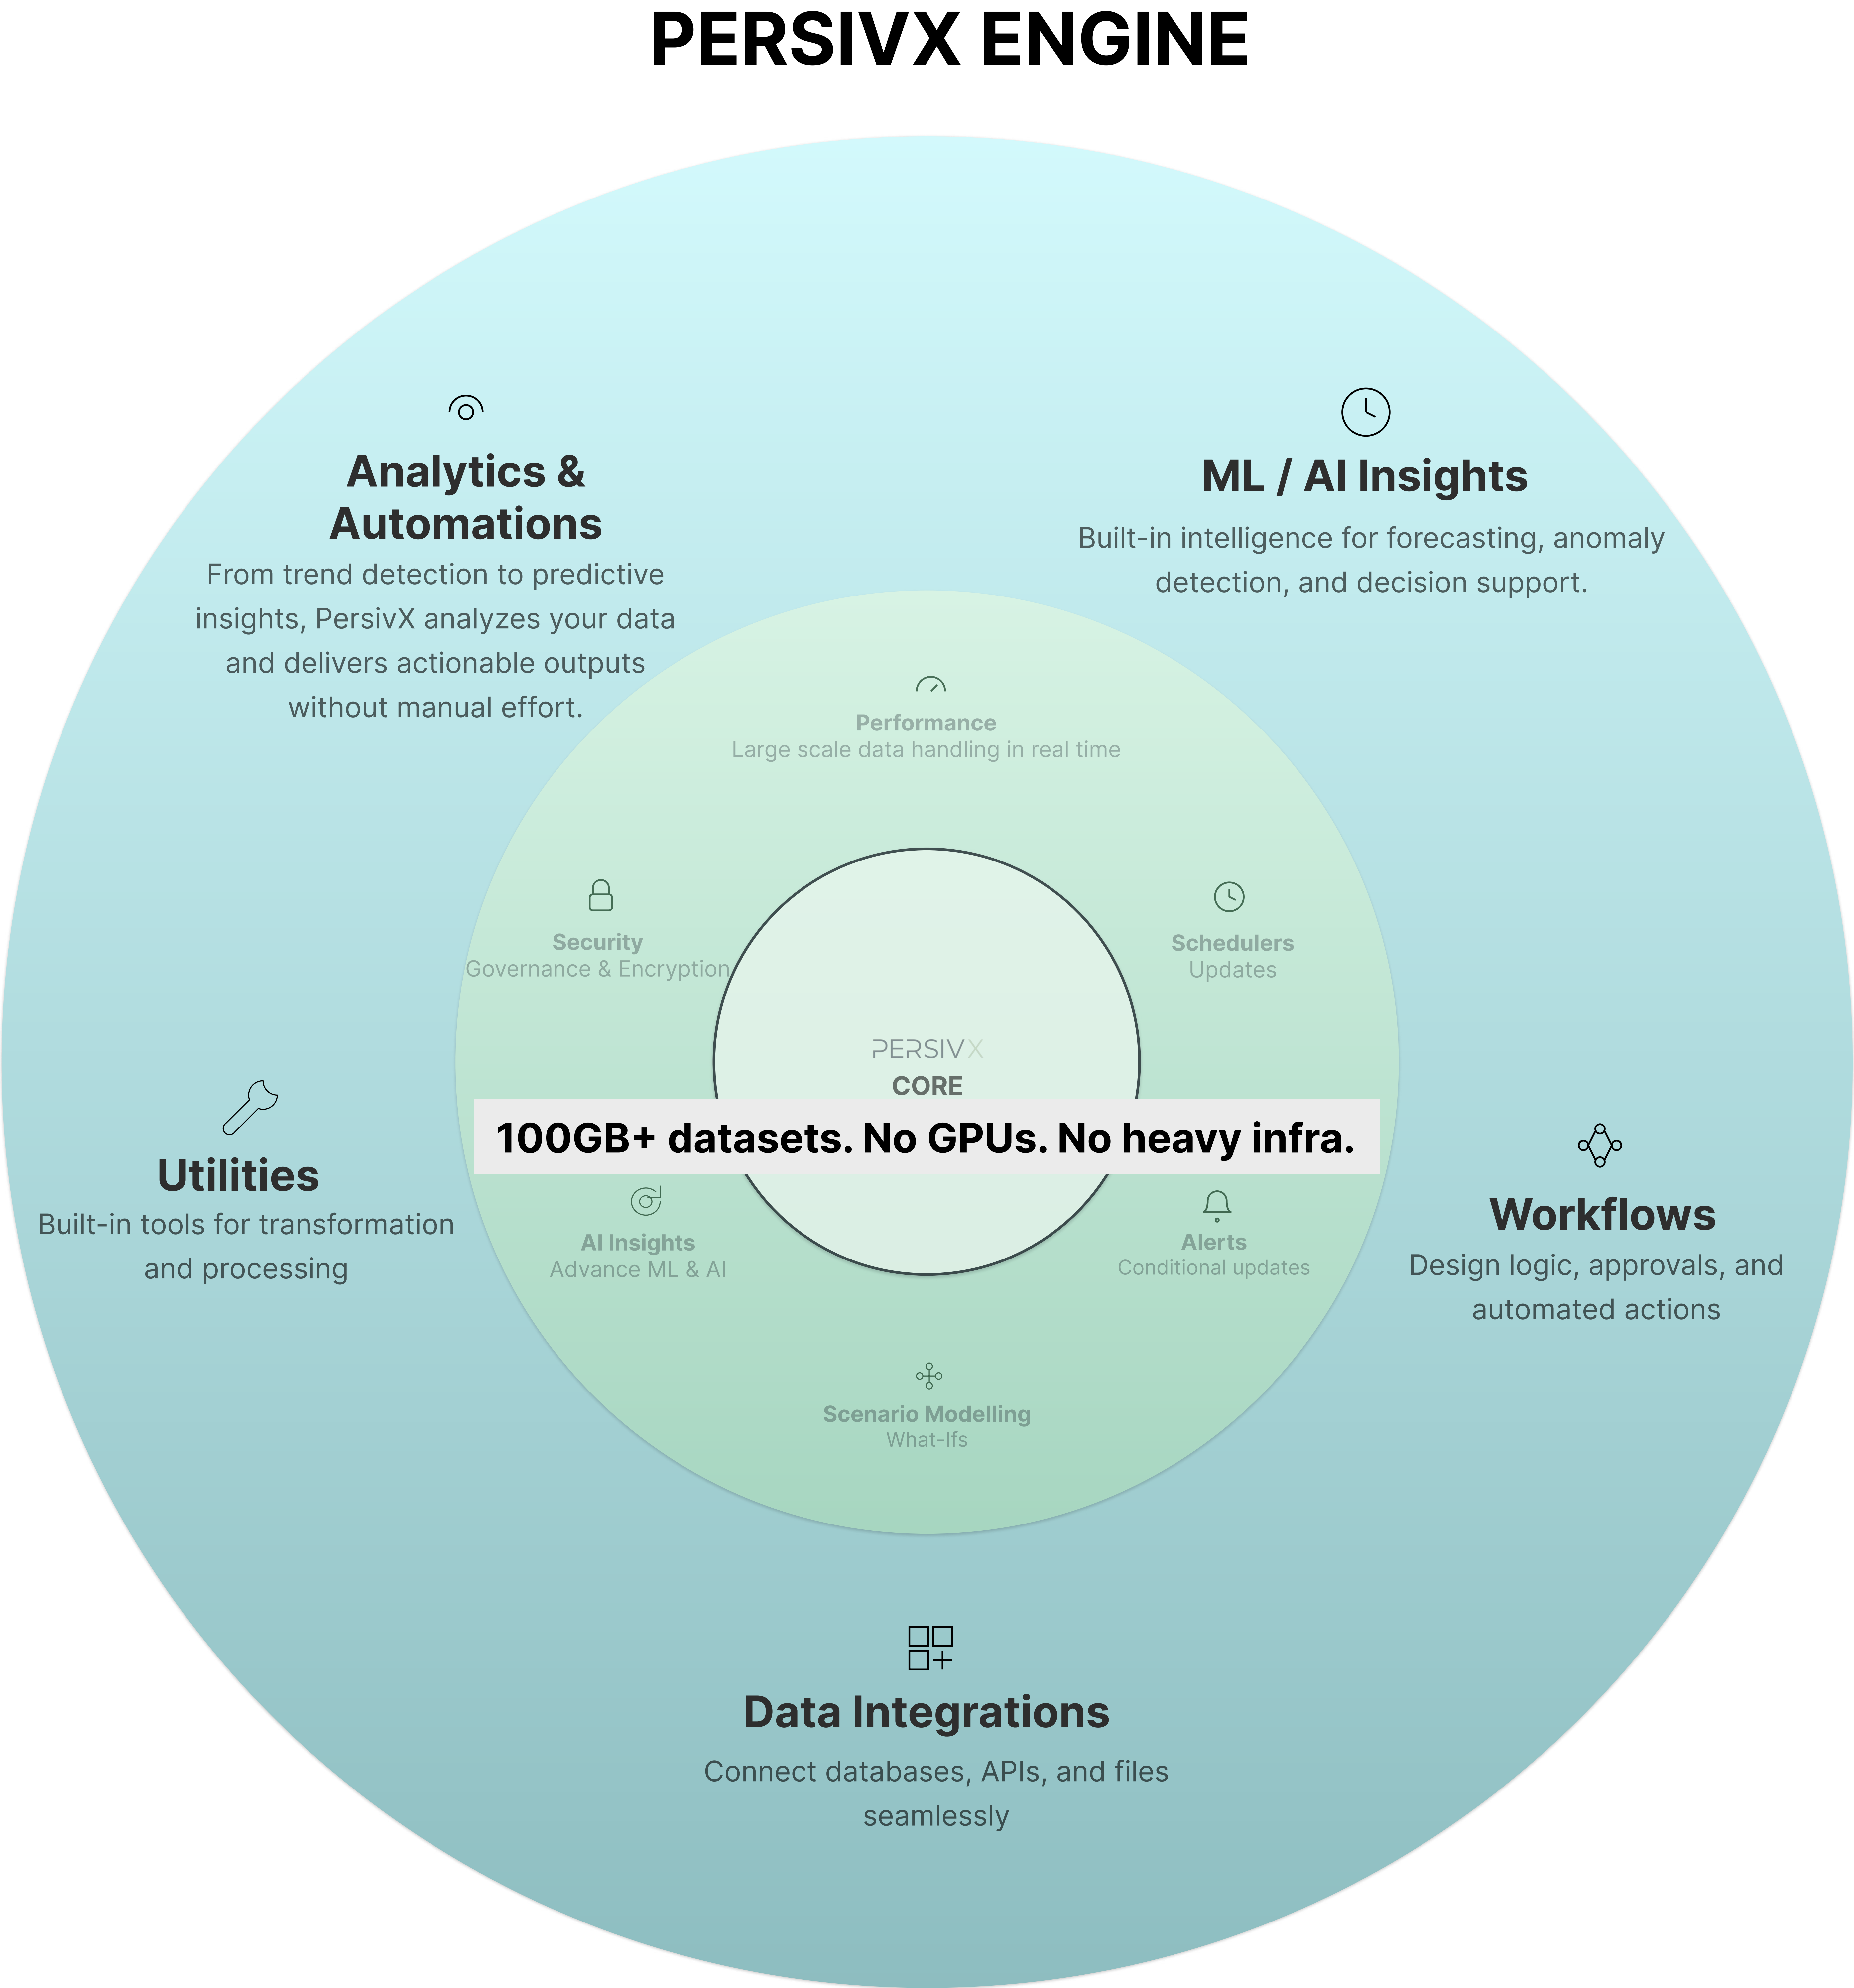

At PersivX, we didn't just fix BI's surface - **we built a BI for the real needs of the modern enterprise.**

We address the core problems holding back other BI tools:

- 1 Fastest Time to Value**
- 2 One Platform, all your Data**
- 3 Automation of Manual Workflows**
- 4 Enterprise-scale performance**
- 5 Enterprise-Grade Security by Default**

Built for speed.
Designed for insights.
Ready for scale.

PersivX isn't just another BI tool - it's your intelligence engine, built to accelerate decisions with precision, performance, and personalization.

Run enterprise-scale analytics, AI, and workflows - without complexity.
100GB+ datasets. No GPUs. No heavy infrastructure.

Core Strategic Capabilities

PersivX empowers businesses with end-to-end intelligence — from real-time operational visibility to advanced analytics, predictive foresight, and AI-driven recommendations. Together, these capabilities ensure organizations not only understand what's happening today but also anticipate tomorrow and act with confidence.

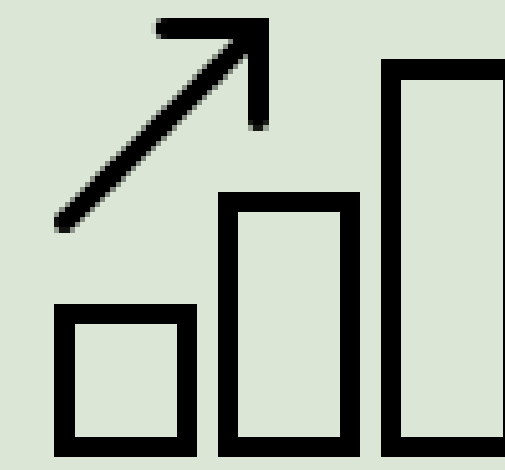

Operational Intelligence

Real-time dashboards and data synchronization provide visibility into daily operations.

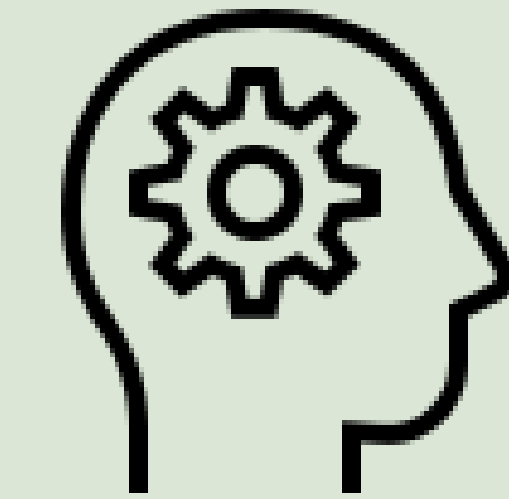

Analytical Intelligence

Advanced analytics tools dissect historical data to uncover trends and performance metrics.

Predictive Intelligence

Machine learning models forecast future outcomes, enabling proactive planning.

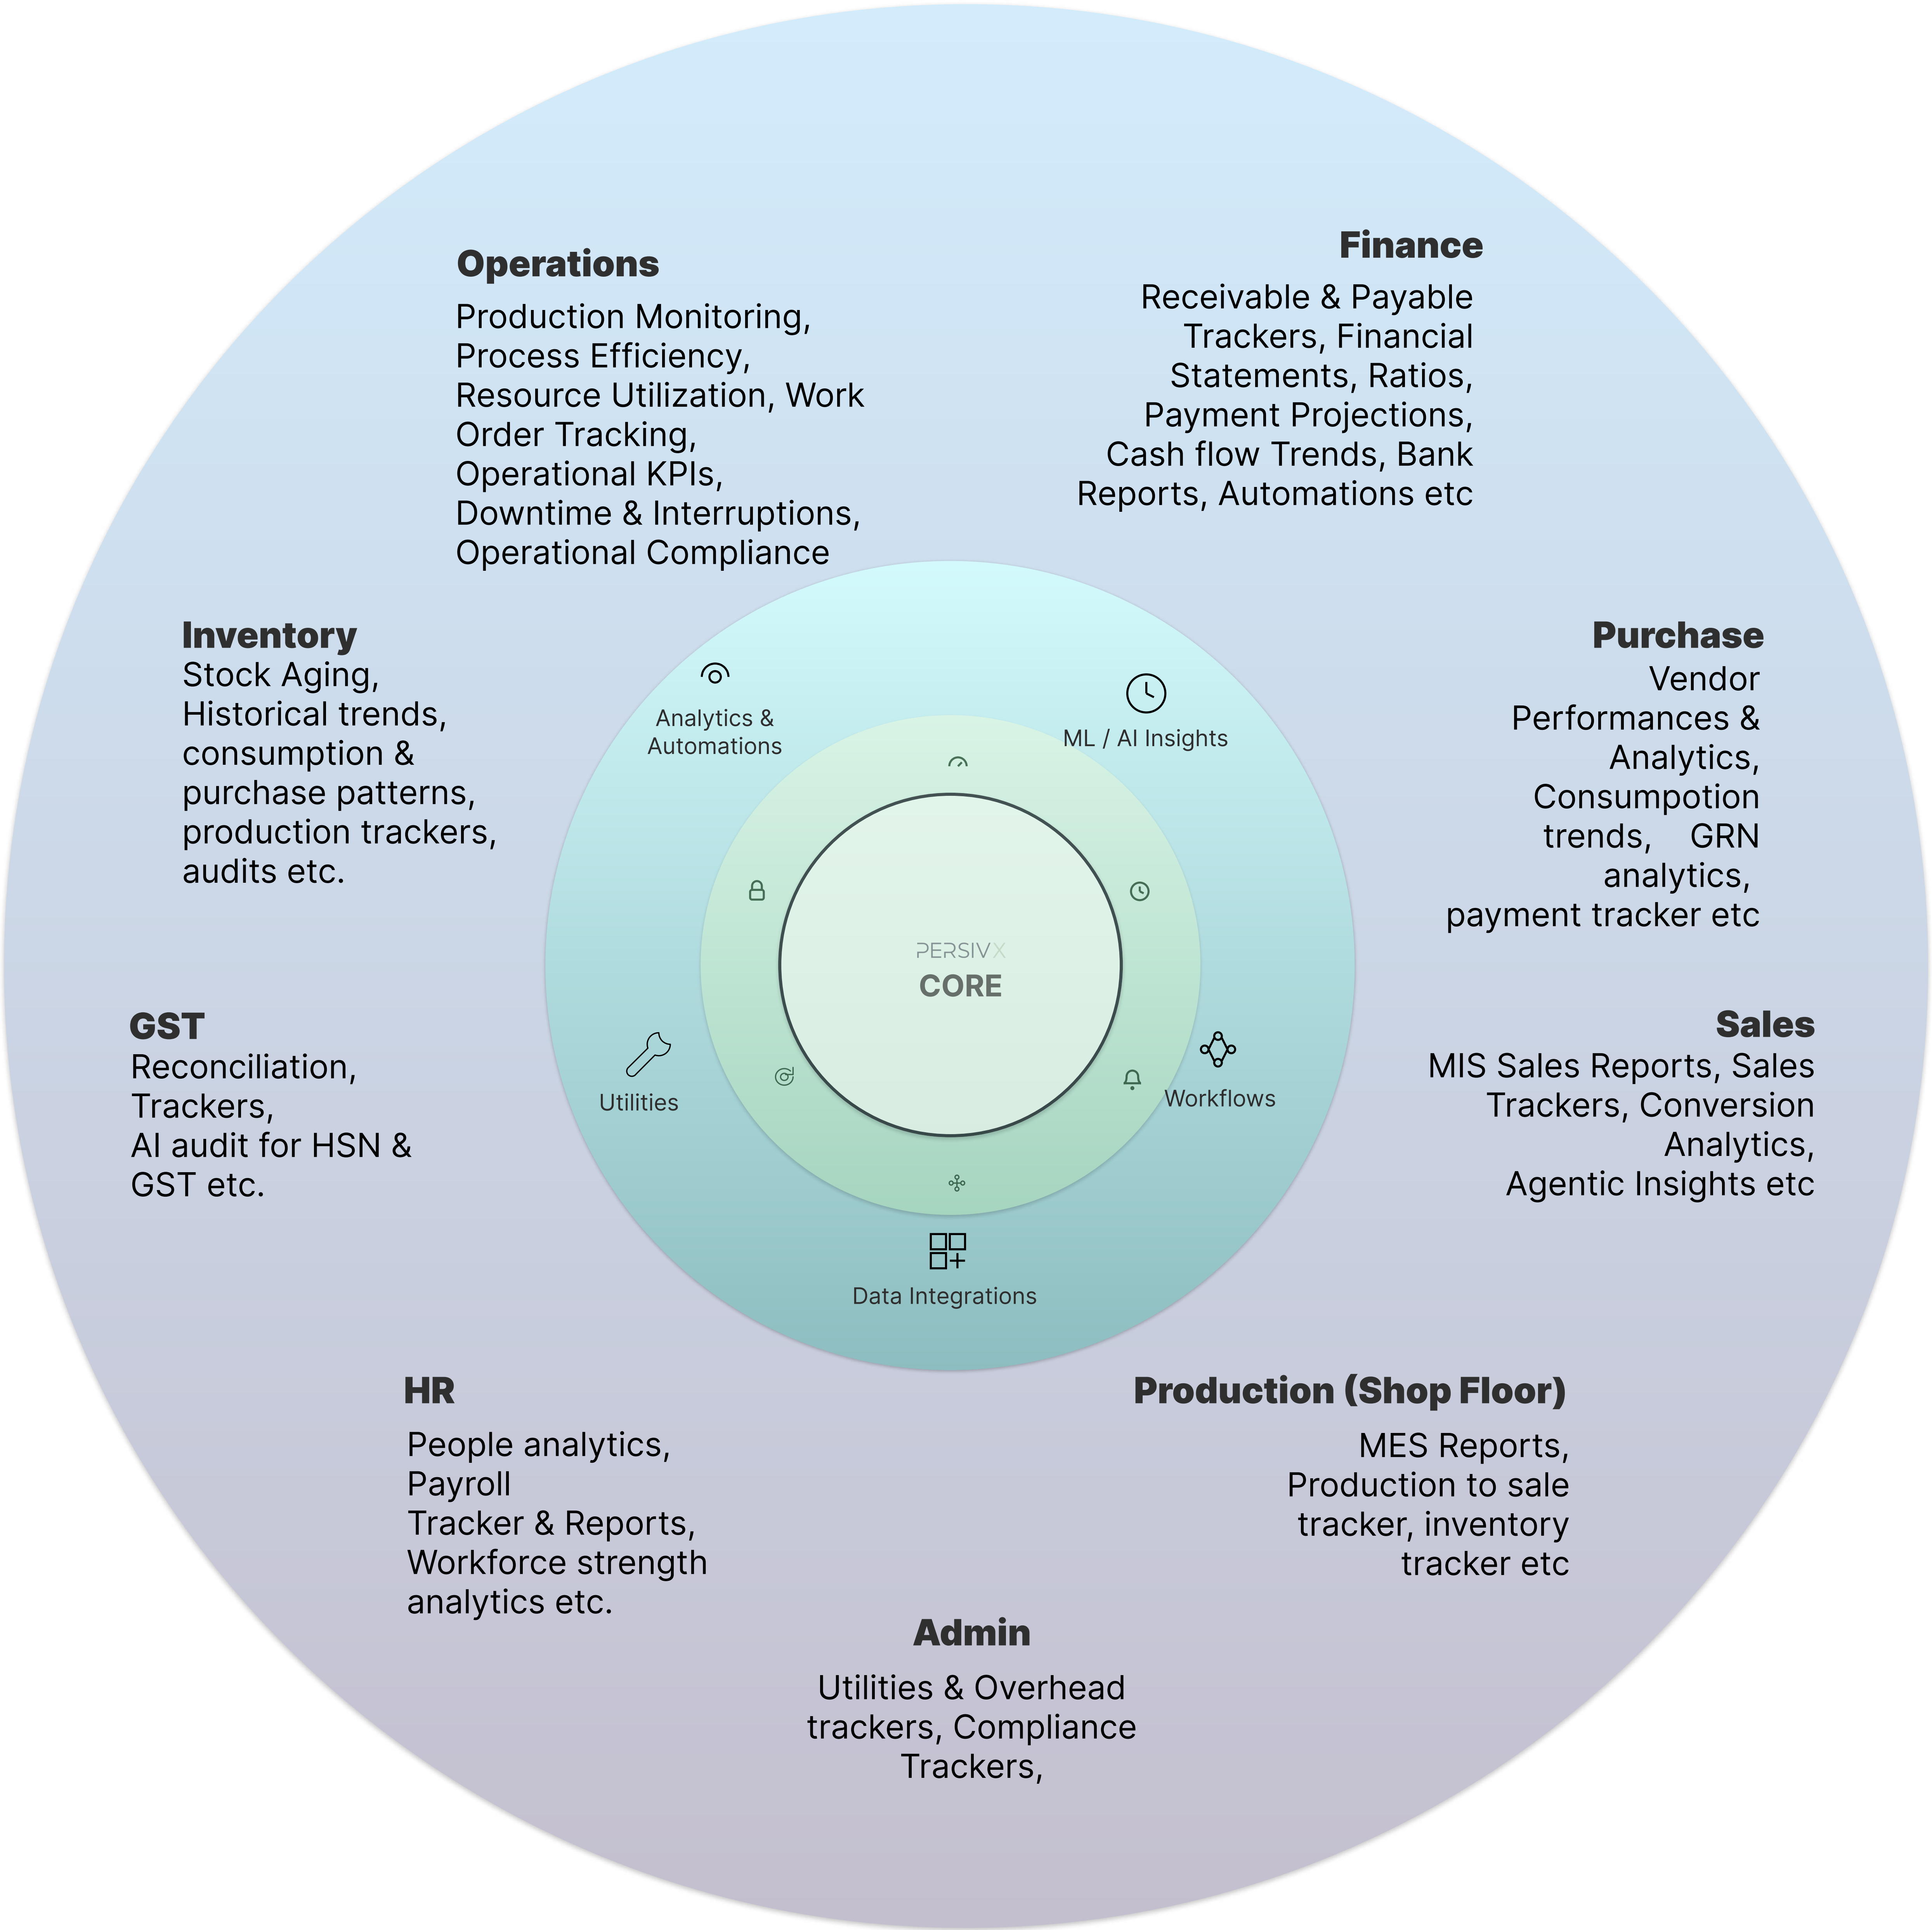

Suggestive Intelligence

Powered by Agentic AI, PersivX delivers intelligent recommendations based on data patterns.

OPERATIONAL REPORTS

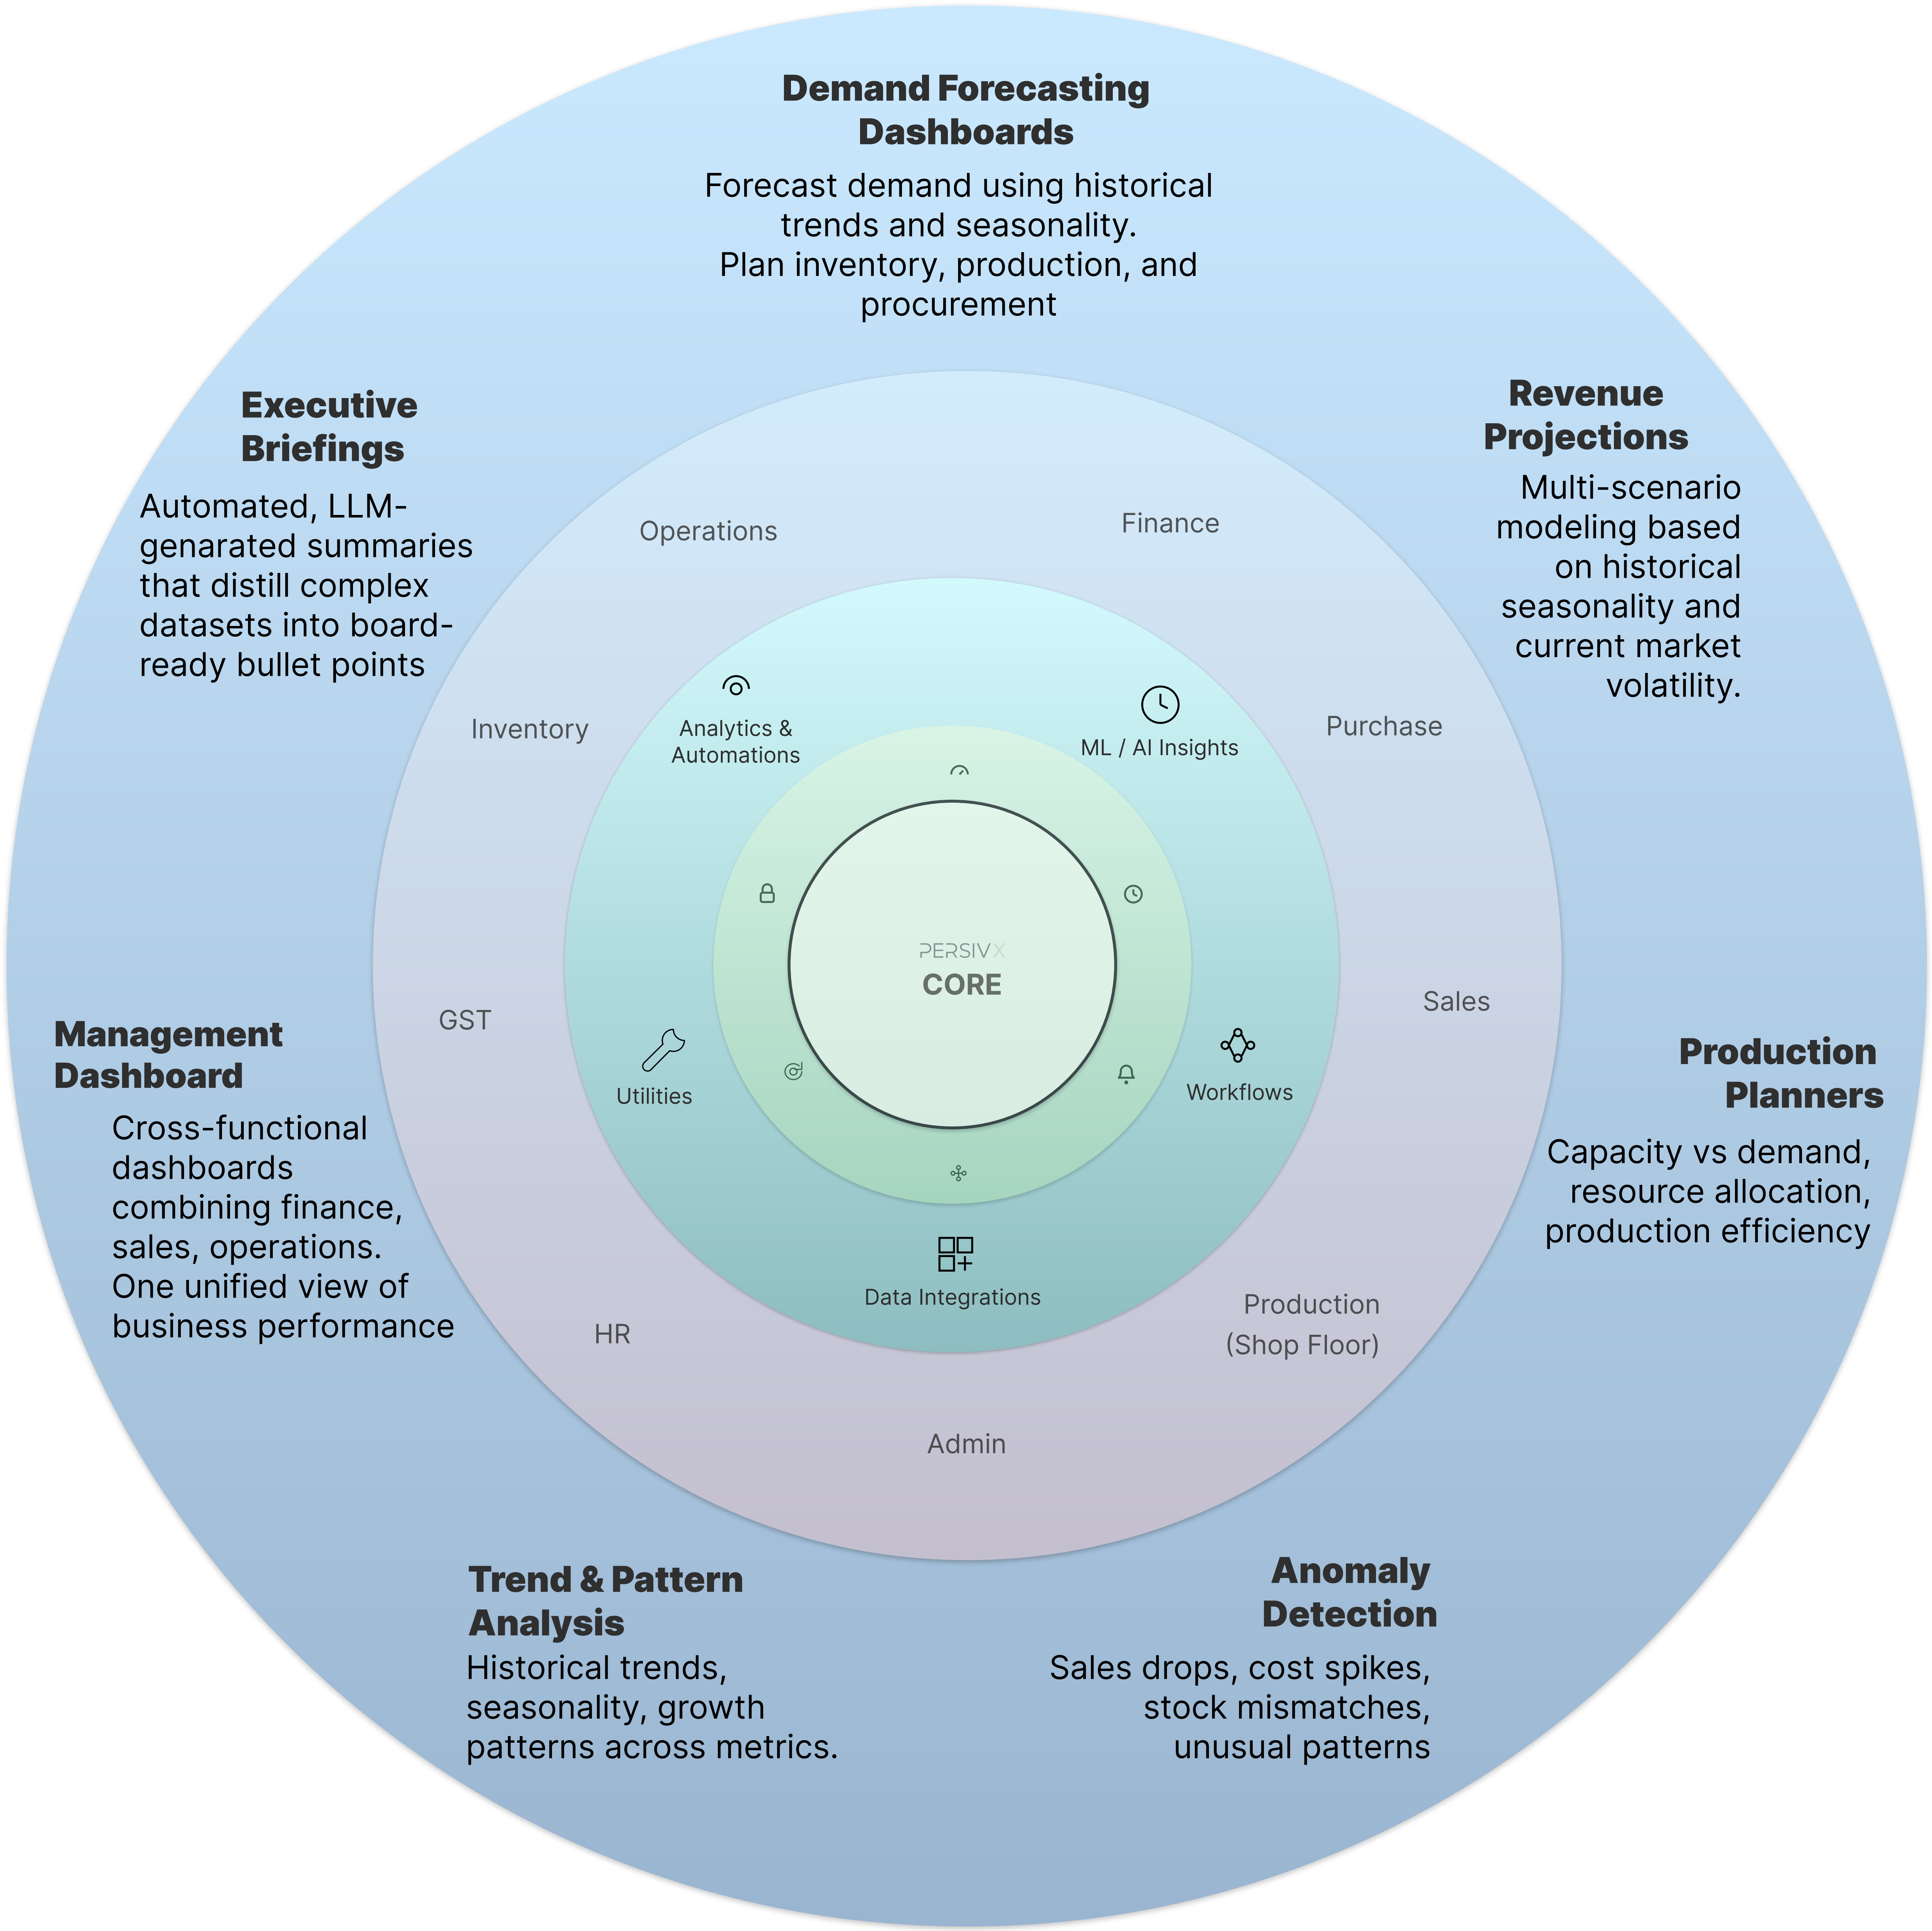

SOME USE CASES

Run enterprise-scale analytics, AI, and workflows - without complexity.
100GB+ datasets. No GPUs. No heavy infrastructure.

ANALYTICAL REPORTS

SOME USE CASES

Run enterprise-scale analytics, AI, and workflows - without complexity.
100GB+ datasets. No GPUs. No heavy infrastructure.

Despite years of investment on other BI tools, decision-makers still face outdated dashboards, fragmented data, and tools too complex for business users.

Addressing Key Problems in BI

1 Fastest Time to Value, Highest ROI

Traditional BI takes days to set up and hours to analyze.
PersivX delivers value from day 1, from onboarding to execution — including predictive models and summaries.

2 One Platform, All Your Data

Different departments work on disconnected platforms.

PersivX connects and blends multiple data sources in real time, no data lake needed everything in one workspace.

3 Automate Manual, Repetitive Workflows

Executives still rely on PDFs and spreadsheets.

PersivX auto-delivers reports, deep insights, strategic recommendations, and alerts to WhatsApp, email, Teams and many other channels - no analyst or export required.

4 Ready for Enterprise Scale

With legacy tools, Large datasets = slow dashboards.

PersivX analyzes 100GB+ datasets on just 8GB RAM - live and blazing fast, even without GPU or cloud dependency.

5 Enterprise-Grade Security by Default

Built-in role controls, IP/domain restrictions, full audit trails, and optional on-premise deployment.

Data control stays where it belongs with you.

Data Governance

Why risk data chaos?

Ensure secure, compliant, and automated control over your data-so the right people always have the right access at the right time.

01 Policy Setup & Control

- Create/update governance policies using a simple UI
- Define access levels for teams, roles, and attributes
- Apply policies instantly across all dashboards

02 Automated Compliance

- Policies enforced automatically in real time
- Version-controlled for audit readiness
- Track every change with full visibility

03 Audit-Ready Logs

- Complete history of who accessed what, when
- Built-in compliance dashboards
- Exportable audit trails for regulators and stakeholders

04 Secure Data Access

- Enforce column- or attribute-level restrictions
- Govern sensitive PII/PHI data with ease
- Access governed data via PersivX API securely

05 Usability & Scale

- Apply governance rules across multiple data sources
- Instantly usable in reports, dashboards, and APIs
- Scales from GBs to TBs of governed data

Success Stories from ICD Dhannad, Indore

First Private Port of Central India

Mr. Ajay Agarwal

MD, ICD Dhannad

“Reports have supported in making Financial and Operational decisions faster. **Their support for development and maintenance of reports is commendable.**”

Mr. Arun Kumar

Head of Operations, ICD Dhannad

“We are truly impressed with how precisely & efficiently the information is made available to us with beautiful dashboards. **We are using the reports in board room meetings.**”

Mrs. Ritu Nair

Head of Finance, ICD Dhannad

Check out the video testimony at - <https://persivx.com/>

“**Our management is extremely satisfied** with all of the 30 to 35 reports created across different Business Functions. The accuracy of reports is commendable as it **saves lots of man hours daily** to create these reports manually.”

Success Stories from Solex Energy

Industry: Renewable Energy Solutions

Mr. Krishna Mekala
GM, Automation Solex Energy

PersivX unified our financial and inventory reporting, cleaned up our books, and freed up 60% of our payments team from repetitive work. We're now moving beyond operations into predictive dashboards that help us plan with confidence.

At Solex Energy Ltd., PersivX modernized financial and operational reporting in just 4 months. Manual, Excel-heavy workflows were replaced with real-time dashboards, enabling instant insights and smarter decisions across departments.

- 20+ key reports delivered across finance, operations, HR etc.
- **90%+ faster reporting** - hours reduced to seconds
- Excel eliminated, **advanced reports adopted within 1 week**
- **High engagement - 300+ avg. minutes/day**, peaking at 643 minutes

Highest impacted departments:

Finance
MOOWRS & Store
Sales
HR

Why Enterprises Choose PERSIVX?

Feature	PersivX	Tableau	PowerBI
Agentic AI Insights	✓	LIMITED	✗
Executive Summaries	✓	✗	✗
Speed on Large data	FASTEST	GOOD	POOR (requires heavy infra)
Custom Visuals	HIGHLY CUSTOMIZABLE	HIGHLY CUSTOMIZABLE	LEAST AMONGST THE THREE
Alerts	MULTI CHANNEL (incl. apps like Telegram, WhatsApp, Teams etc.)	EMAIL / Web sockets	EMAIL / Web sockets
Multi Data Source Analysis Blend data from different sources like databases, API, files etc to build reports	✓	✗	✗
Time to Value	Days	Weeks	Weeks
Team dependency	Low	High	High
Device Support	ALL SMART DEVICES Use on Desktop, Phone, Tablets, Smart TV - with support for all features directly	Desktop / Phone / tablets (limited features)	Desktop / Phone / tablets (limited features)
Easy of use & learning curve	EASY TO LEARN	HARD TO LEARN	MODERATELY DIFFICULT
Infra Cost	Low	High	High
Data Governance	✓	✗	✗

Make Faster, Smarter Decisions with PersivX

From Excel-heavy reporting to real-time decision systems.

See PersivX in action. Go live in days. Start with one dashboard. Scale across your business.
